PRESS RELEASE

bee smart city and polisMOBILITY renew partnership

Muelheim/Ruhr, April, 2023. We are pleased to announce that bee smart city is once again partnering with polisMOBILITY. Last year's polisMOBILITY was a great success. With an exciting conference programme on the topic of future urban mobility, the event attracted and convinced many visitors. This year, polisMOBILITY will take place again. When? From 24 May to 26 May 2023. Where? In Cologne (Kölnmesse), Germany.

FOCUS: MUNICIPAL FIELDS OF ACTION

[polisMOBILITY](#) is the networked, international event for the future of mobility and urban life. The [polisMOBILITY conference](#) provides a meeting point for stakeholders from business, municipalities, politics, science and civil society to jointly develop and advance the complexity of the technical and societal tasks of a sustainable transport transition. As a platform to promote active change and integrated solutions across sectors, the conference focuses on the state of technical development as well as governance and strategy issues from a cross-sector, cross-level and cross-actor perspective.

WORKSHOPS FOR THE SUSTAINABILITY OF CITIES AND MUNICIPALITIES

Unlike last year, this year's polisMOBILITY also offers a variety of workshops with a practical focus.

The focus is on the role of the municipality.

bee smart city will also be at this event to connect with solution providers, partners and communities who share our vision for a more sustainable and resilient future.

PRESS RELEASE

About bee smart city:

bee smart city is a specialized digital software and consulting company dedicated to empowering municipalities to successfully manage the transformation of smart and sustainable cities and regions. With the Smart City Toolbox - a unique software-as-a-service solution for cities and regions - we enable the effective management of smart city strategies and corresponding projects digitally and collaboratively in one place. With more than 14,000 members from 170 countries, bee smart city operates the largest free [smart city online network and community](#) where smart city professionals can share knowledge, learn and gain market insights. The platform is also available as a white label solution for organizations that want to foster collaboration between different stakeholders. In addition, we offer a unique global Smart City tender service that provides solution providers with access to newly published Smart City tenders worldwide. Last but not least, we advise cities on the design and implementation of Smart City strategies and solutions.
